1 About this egg

1.1 Version history

- 2.325 install step is done via process-execute to allow replacement of running chicken-setup instance
- 2.321 IEEE float constant fix
- 2.320 Removed MSVC support, better prefix handling
- 2.319 Some changes and a fix in the setup script again [Thanks to John Cowan again]
- 2.318 Fix in setup script [Thanks to John Cowan]
- 2.317 Initial release as egg

2 Documentation

This extension packages the newest development snapshot of the CHICKEN base system as an egg.

When installed via `chicken-setup`, the development snapshot will be configured, built and installed with the same settings as the previously installed (the current) version of CHICKEN. To pass extra options to `configure`, invoke `chicken-setup` with the configuration options following `--`, like this:

```
% chicken-setup chicken -- --without-XYZ ...
```

You will need `autoconf`, `automake` and `libtool`.
